Subject: 2020 WidePoint Cybersecurity Solutions Corporation SSP Public Key Infrastructure (PKI) Compliance Audit Report

The Slandala Company conducted a compliance audit of the WidePoint Cybersecurity Solutions Corporation Public Key Infrastructure (PKI) to verify that the PKI was being operated in accordance with the security practices and procedures described in the following Practices and Policies:

- *Certification Practices Statement for the WidePoint (formerly Operational Research Consultants, Inc. (ORC)) Shared Service Provider (SSP) Public Key Infrastructure (PKI), Version 4.2.3, 22 October 2019*

WidePoint operates several Public Key Infrastructure systems collectively referred to as the Information Assurance/Identity Management System (IA/IDM). These systems include the following certificate authority, asserting the identified policy OIDs:

- CN = ORC SSP 4, O=ORC PKI, C=US
  - Policy Identifier=2.16.840.1.101.3.2.1.3.6
  - Policy Identifier=2.16.840.1.101.3.2.1.3.7
  - Policy Identifier=2.16.840.1.101.3.2.1.3.8
  - Policy Identifier=2.16.840.1.101.3.2.1.3.36
  - Policy Identifier=2.16.840.1.101.3.2.1.3.13
  - Policy Identifier=2.16.840.1.101.3.2.1.3.17
  - Policy Identifier=2.16.840.1.101.3.2.1.3.39

The Compliance Audit evaluated the Certificate Authority, Directory Server, Certificate Status Servers and Card Management Systems components associated with this CA. RA operations by agencies supported by the Widepoint PKI are included in individual audit reports. The compliance audit reviewed findings from the previous year. Findings that were identified previously are identified in the audit report. There have been no major changes to the system.

The audit also evaluated conformance to the requirements of the Memorandum of Agreement (MOA) between Widepoint and the FPKIPA covering interoperability between the WidePoint SSP PKI and the FPKI (MOA Template Version 2.0) , signed August 2017.

The compliance audit was performed via interviews, documentation reviews and site visits performed in March 2020. This audit covers the following period:

- Audit Period Start: March 2019
- Audit Period Finish: March 2020

The operational compliance audit was performed using a requirements decomposition methodology and was initiated by first performing a direct CP-to-CPS traceability analysis.

The Certification Practices Statement for the WidePoint (formerly Operational Research Consultants, Inc. (ORC)) Shared Service Provider (SSP) Public Key Infrastructure (PKI), Version 4.2.3, 22 October 2019 was evaluated for conformance to the following policy:

- X.509 Certificate Policy for the U.S. Federal PKI Common Policy Framework, Version 1.31, February 8, 2019

CPS practices found to not comply or address the requirements of the applicable policies, as part of the traceability analysis are categorized as “Disparate.”

The CPS was reviewed and decomposed into requirements, and the requirements were then evaluated to determine the general methodology for their evaluation and the activities that should be taken by the auditor to fulfill the audit of that requirement. The audit step activities are performed during the site visits and documentation reviews. Observations and recommendations are identified and may be included. Findings and data are recorded during these activities, and are categorized as follows:

- Complies – operations comply with the practices documented in the CPS,
- Discrepancy – operations do not comply with the practices documented in the CPS,
- Recommendation - operations comply with the practices documented in the CPS; however, improvements to the implementation could be considered.

The audit was performed by Mr. James Jung of The Slandala Company, who acted as the lead auditor. Mr. Jung has performed audits of PKI systems since 2002 and has more than 35 years’ experience in the design, implementation and certification of information assurance systems. He is certified by the International Information Systems Security Certification Consortium (ISC) <sup>2</sup> as a Certified Information Systems Security Professional (CISSP) and is certified by the Information Systems Audit and Control Association (ISACA) as Certified Information Systems Auditor (CISA). He has implemented or operated PKI systems for the Department of State, the Department of Energy, the Federal Bureau of Investigation, the Department of Homeland Security, the United States Patent and Trademark Office (USPTO) and other agencies and commercial companies. He has provided PKI audit and compliance support for the Department of State, the Department of Labor and several of the Department of Defense (DoD) agency Registration Authorities, Local Registration Authorities and External Certificate Authorities. Mr. Jung has been the lead auditor for the Department of Defense Certification Authorities the Department of Treasury Public Key Infrastructure (PKI) and Shared Service Provider (SSP) and the Federal PKI (FPKI) Trust Infrastructure, including the Federal PKI Common Policy Framework (FCPF) Certification Authority and the Federal Bridge Certification Authority (FBCA).

Mr. Jung has not held an operational role or a trusted role on the WidePoint PKI systems, nor has he had any responsibility for writing the Certificate Practices Statements. The Slandala Company and Mr. Jung are independent of the WidePoint PKI and its operations and management.

Information from the following documents was used as part of the compliance audit.

- *Certification Practices Statement for the WidePoint (formerly Operational Research Consultants, Inc. (ORC)) Shared Service Provider (SSP) Public Key Infrastructure (PKI), Version 4.2.3, 22 October 2019*
- *X.509 Certificate Policy for the U.S. Federal PKI Common Policy Framework, Version 1.31, February 8, 2019*
- *Memorandum of Agreement (MOA) between Widepoint and the FPKIPA covering interoperability between the WidePoint SSP PKI and the FPKI (MOA Template Version 2.0) , signed August 2017*
- *Public Key Infrastructure Interoperability Test Report: May 2018 – WidePoint SSP*
- *Federal Election Commission Registration Practice Statement, version 3.1 July 2019*
- *ORC Personal Identification Verification Card Issuance (PCI) Operations Plan, February 5, 2014, Version 1.4*

- *WidePoint Cybersecurity Solutions Corporation Incident Response Plan Test Report, June 28, 2019*
- *Federal PKI Activity Reports 2019*

The Certification Practices Statement for the WidePoint (formerly Operational Research Consultants, Inc. (ORC)) Shared Service Provider (SSP) Public Key Infrastructure (PKI), Version 4.2.3, 22 October 2019 was evaluated for conformance to the X.509 Certificate Policy for the U.S. Federal PKI Common Policy

Framework, Version 1.31, February 8, 2019. The analysis identified eight instances where policy description and the practice description were disparate.

The audit included a compliance audit of the practices described in the Certification Practices Statement for the WidePoint (formerly Operational Research Consultants, Inc. (ORC)) Shared Service Provider (SSP) Public Key Infrastructure (PKI), Version 4.2.3, 22 October 2019. Nine items did not comply with the policy or practice statements.

No failures were found that suggested that the system had been compromised or operated in an overtly insecure manner. It is the lead auditor's opinion that the WidePoint PKI systems provided reasonable security control practices.
